

WRAPPING

MOD.
AVR1000

CARBON FIBER RING & SLIP RING CONTACTS

HIGH PERFORMANCE

STABLE LOADS

LOWER ENERGY & FILM CONSUMPTION

PATENTED SYSTEM TO SECURE THE FILM

HIGH RELIABILITY & LITTLE MAINTENANCE

Applications

Paper

Cardboards

Ceramic

Plastic/Cans

Bags

Glass

AVR1000

The new AVR1000 has been developed with a carbon fiber ring, slip ring contacts and a pre-stretch carriage up to 300% ratio. The principle of the "ring", allows to execute the wrapping cycle without any movement of the pallet load. As a consequence, the quality and the stability of the pallet load are not endangered and important production capacities remain guaranteed. Possibility to start and stop the wrapping cycle at any height of the pallet load, allowing specific wrapping programs, such as top wrapping and single wrapping. Strong

points: exclusive and patented pre-stretch system, high speed, simplicity and flexibility. The results are a largely increased reliability and reduced maintenance as well as stable loads with minimal film consumption. At the end of the cycle, the final film tail is safely inserted under the previous wrap or welded with halogen lamp device (based on option chosen). As results no loose film ends, guaranteeing a perfect finishing as well as no pallet alignment needed as the system detects and moves towards the pallet.

Technical data

Power supply

Voltage 400V 3Phases (50Hz)

Installed power ~ 9 kW

Air supply

Pressure 5,5 ÷ 6,5 bar

Consumption ~ 24 NL/cycle

Film coil size

Width 500 mm

Max external diameter 250 mm

Max weight ~ 20 kg

Production

Capacity Up to 100 packs/h (120 packs/h with twin carriages version)

Pack size (standard machine)

Long side Min./Max. 200 / 2000 mm

Short side Min./Max. 410 / 1600 mm

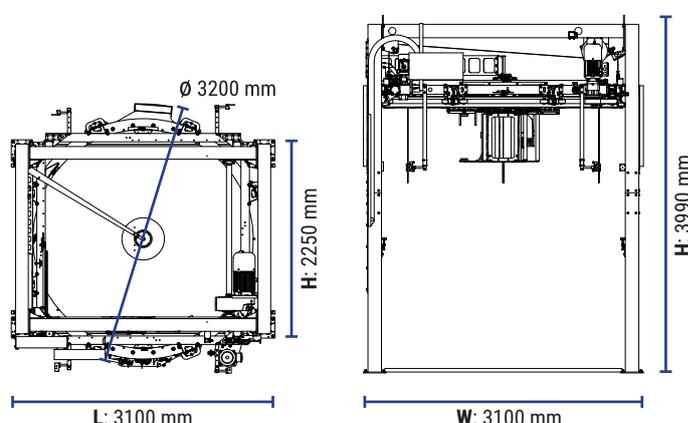

Height Min./Max. 500 / up to 2000 mm

Diagonal \varnothing 2400 mm

Transport

Minimum height 100 mm

Machine dimensions

Options:

- > Motorized pantograph stabilizer press;
- > Gravity stabilizer press;
- > Lifting device;
- > Single band lower;
- > Double twin band lower;
